First Day of  
Spring

April 1st-  
April Fools Day

April 5th-  
Passover Begins

April 5th-  
Spring Party

April 9th-  
Easter

April 22nd-  
Earth Day

# Poko Loko's Integrated Pest Management Notification

We would like to inform you that an Integrated Pest Management (IPM) approach for controlling insects, rodents, and weeds is used at Poko Loko. The IPM approach we will be using focuses on making our center and grounds an unfavorable place for pests to live and breed. Through maintenance and cleaning, we will reduce or eliminate available food and water sources, and hiding places for the pests. We will also routinely monitor the school area to detect pest problems and prevent the pests from becoming established. Some IPM techniques we will employ include monitoring, sanitation, sealing entry points, physically removing the pest, and modifying storage practices. From time to time, it may be necessary to use chemicals to control a pest problem. Chemicals will only be used when necessary, and will not be routinely applied. When chemicals must be used, the school will try to use the least toxic products when possible. Access to treated areas will be secured against unauthorized access for the period specified on the pesticide label. Notices will be posted at application sites and will remain there until the posted safe re-entry time is met.

As part of Poko Loko's IPM system we contract with Anderson Pest Solutions and their licensed, certified technicians. They inspect and service our center at 6:00 a.m. on the first Wednesday of every month. You may request prior notification of specific pesticide applications made at the school. To receive notification, you must be placed on the notification registry. The registrants will be notified at least 72 hours before a pesticide is applied. If a chemical application must be made to control an emergency pest problem, notice will be provided as soon as possible after the application. Exemptions to this notification include cleaners (disinfectants), pesticides formulated as baits or gels, and any EPA exempt pesticide. If you would like to be placed on this registry, please complete and return the information below:

I would like to be notified before any specific pesticide application is made at this school. I understand that I will be notified after the application, if the pest problem requires an emergency application. I also understand that there will be no notification for EPA exempt pesticides, cleaners, or bait and gel products.
